

3rd ISoP-UMC Training Course

From case reports to benefit-risk assessment and risk communication

7-9 September, 2016
Lima, Peru

INSPIRE. ENGAGE. TRANSFORM.

– Building a global safety culture

Building a global safety culture

International Society of Pharmacovigilance (ISoP) and Uppsala Monitoring Centre (UMC) are pleased to announce their third jointly organized pharmacovigilance training, scheduled for the 7th to 9th September 2016 in the historic capital city of Lima, Peru. This is the first ISoP-UMC joint training course in Latin America.

ISoP and UMC have a common interest to offer appropriate education and training in pharmacovigilance globally including to collaboratively intensify their activities in Latin America.

The course focuses on essential topics including:

- Individual case safety reports and Spontaneous Reporting Systems
- Signal detection and management
- Clinical assessment of signals
- Drug-drug interactions
- Assessment of benefits and harms
- Risk communication
- Counterfeiting of medicinal products
- Medication errors and off-label use
- Pharmacovigilance in Public Health Programmes

The Latin America course is tailored to regional needs and addresses challenges unique to this area.

Programme outline

This three day-course is conducted with expertise from UMC and ISoP, and designed for interdisciplinary groups to learn and work together in contributing to patient safety when medicines are used.

At the end of the course, the participants are expected to understand the complexities of pharmacovigilance and to use various sources of information about risks and appropriate tools to advance better detection, monitoring, reporting and prevention. Assessment of causality and the balance of benefit-harm of medicinal products and communication are other important course contents that will align regulators and industry to promote product safety.

Lectures, working groups and panel discussions will be the main training method. There will be ample opportunity to exchange views and ideas in discussions following individual presentations, after the panel discussion at the end of the seminar and during coffee breaks.

Target group

The training course is tailored to engage all interested pharmacovigilance professionals in a regulatory, industry, hospital, university or community setting.

About Lima

Lima is the capital and the largest city of Peru (population of almost 10 millions). With a rich historical and architectural heritage, Lima is headquarters to major banks and many national companies and enjoys a very privileged location in the heart of South America. Average temperature for the month of September would be 18 °C.

Discover more about Lima on the websites :
www.peru.travel/?internacional
www.go2peru.com/peru_guide/lima/historical_center.htm

Meeting venue

The course will take place at Hotel Jose Antonio, located in the exclusive district of Miraflores (a residential & commercial area) three minutes away from the Pacific Ocean and a few minutes away from commercial areas, culture, cinemas, restaurants. The hotel is located thirty minutes away from the international airport Jorge Chavez with many destinations in South America (There are direct and stop-over flights to Lima from the main capitals of the world) and twenty minutes away from the historical downtown of Lima.

More information about the venue and accommodation can be found online at:

www.isoponline.org/training/isop-umc-training-courses

Faculty

The course faculty consists of Latin American and international experts in pharmacovigilance, representing government, academia, and industry. Some lectures will be in Spanish and the others will have simultaneous translation.

Training certificates of attendance will be provided to those who complete the course.

Pricing

The costs for the 3-day seminar (7, 8 and 9 Sept. 2016):

450 € for ISoP members
560 € for non members
350 € for emerging countries / students ISoP members
400 € for emerging countries / students non members
300 € for Ac/Gvt Peru (limited seats).

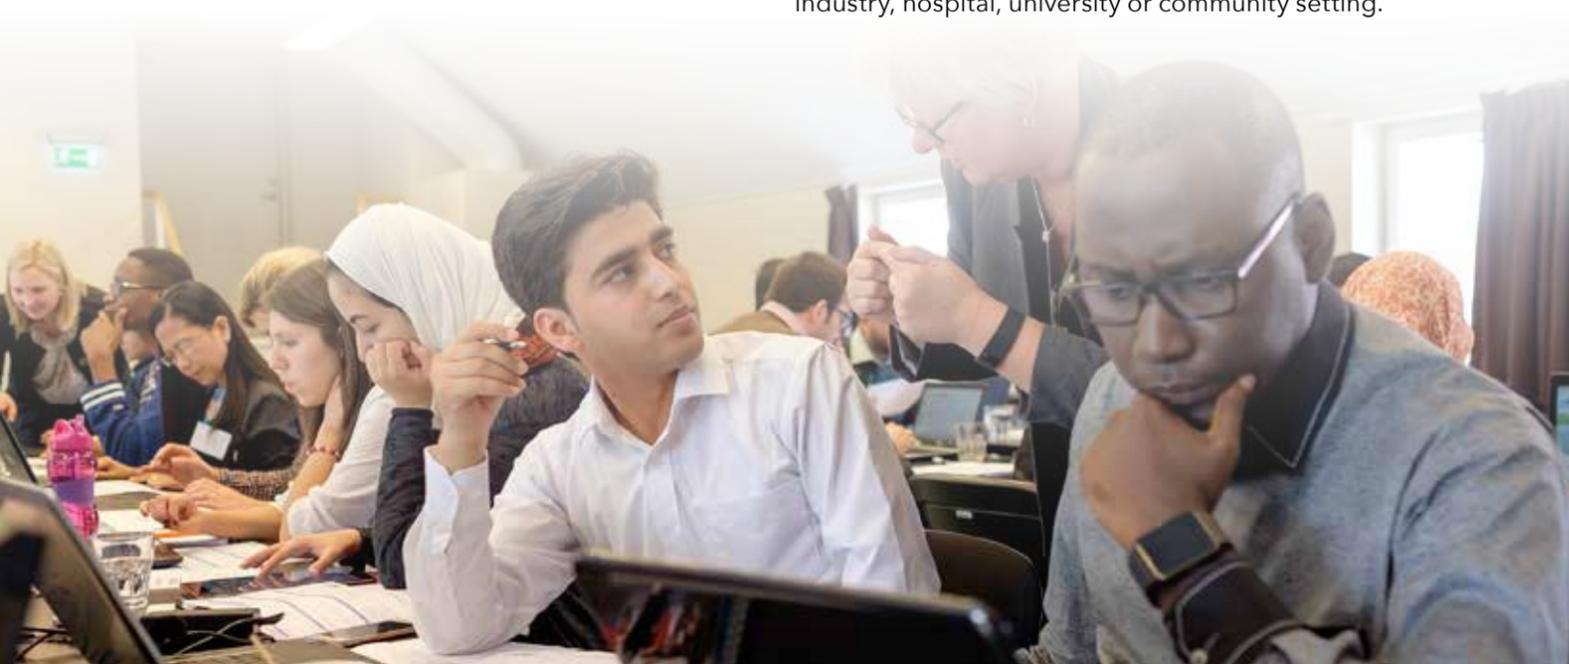

The costs include coffee breaks, but do not include accommodation, lunch, dinner or travel expenses. For more details, please visit the website www.isoponline.org.

How to apply?

Practical information, programme and registration forms are available online www.isoponline.org/training/isop-umc-training-courses and from the ISoP administration office:

Address: ISoP Secretariat Ltd

About Uppsala Monitoring Centre

Uppsala Monitoring Centre (UMC) advances the science of pharmacovigilance and inspires patient safety initiatives all over the world. As an independent, non-profit foundation, UMC engages stakeholders who share their vision and collaborates to build a global patient safety culture. As a leader in the research and development of new scientific methods, UMC explores the benefits and risks of medicines to help minimise harm to patients, and offers products and services used by health authorities and life-science companies worldwide. For almost 40 years, UMC has provided scientific leadership and operational support to the WHO Programme for International Drug Monitoring. (www.who-umc.org)

About ISoP

The International Society of Pharmacovigilance (ISoP) is an international non-for profit scientific society, which aims to foster science, learning and research in pharmacovigilance. We do this to enhance all aspects of the safe and proper use of medicines, in all countries.

ISoP is open to anyone with an interest in the safe and effective use of medicinal products. For these aims we provide opportunities for networking in a friendly environment, a collegial and convivial support among fellow pharmacovigilance professionals, an open and impartial forum for sharing experience, knowledge and solutions, a platform for discussion and generation of new research and ideas, and meetings, education and affordable training (www.isoponline.org).
