MEDICATION SAFETY PROGRAM

Description
The International Society of Pharmacovigilance (ISoP), Middle East Chapter is organizing a medication safety program designed to help in enhancing medication safety knowledge for healthcare providers. It is divided into three levels and will take the participants from the basics of medication safety to an advanced level in medication safety. The program is given by top notch experts in medication safety in the region.

Objectives
• Explaining the current practices of medication safety in different organizations.
• Explaining the role and responsibilities of the medication safety officer (MSO).
• Performing system-based medication error analysis.
• Identifying failures that lead to medication error events.
• Developing strategies for the use of high-alert medications
• Identifying tools available in medication safety.
• Understand human error, at-risk behavior, and reckless behaviors.

Who should attend
• Healthcare professionals including physicians, pharmacists, and nurses.
• Medication safety officers /managers.
• Health colleges students.
