Our Vision

In **2025** ISoP will be recognized as the leading global champion for education and research in pharmacovigilance and the safe use of health care products.

Our Goals

1. Long-term financial and organizational **sustainability and stability** of ISoP: To continue having a strong society that will enable us to achieve our other two goals.

2. Create and build a community for optimizing the **safer use of health products with a measurable impact on patients and healthcare professionals**. Every action, training, and research must impact patients and families for the better. We need to prioritise problems with managing health care products and promote effective solutions.

3. Maintain and enhance **scientific knowledge and competencies in the global pharmacovigilance community**: ISoP members are the essence and soul of ISoP, our society exists because of you. Our intention is to give enough benefits of networking for each ISoP member to feel happy and privileged for being part of this knowledge community. Let us know what you want from your society.
Writing this message as the new ISoP President is a great pleasure. If you don’t know me, I am Angela Caro from Colombia, a passionate pharmacovigilante who has worked in the field since 2005.

Our society is an academic and scientific organization; we welcome members from many backgrounds, i.e. academia, regulatory authorities, industry, and any healthcare professionals interested in pharmacovigilance and patient safety. ISoP currently has members from over 100 countries. Therefore ISoP is the perfect platform to discuss and exchange the most advanced knowledge in pharmacovigilance for everyone.

We hope that by 2025 “ISoP will be recognized as the leading global champion for education and research in pharmacovigilance and the safe use of health care products”. The Advisory Board is working hard to achieve this Vision, but also we need more enthusiastic ISoP members, like you, to help us to reach this Vision.

Welcome to ISoP!
Our History

The International Society of Pharmacovigilance (ISoP), formerly called the European Society of Pharmacovigilance (ESOP), was founded in 1992 as a not-for-profit scientific organisation. In 2000, the European Society of Pharmacovigilance became the **International Society of Pharmacovigilance (ISoP)**.

Annual Meetings and Training Courses

ISoP holds annual meetings which are open to all interested in pharmacovigilance. We are confident that our presence in different parts of the world will stimulate pharmacovigilance and reinforce the truly global nature of ISoP and our spirit of collaboration.

In addition to its annual meeting, ISoP organizes courses on such topics as general drug safety (introductory and advanced levels), case management, risk management, communication, benefit-to-harm assessment, pharmacoepidemiology and related issues. These take place in various countries with international experts.

Meetings and events in 2024

ISoP Mid-Year Symposium

“The value of real-world data for ensuring patient safety”
In collaboration with IDIAP Jordi Gol
3-4 June 2024 | Barcelona, Spain

Stay tuned for upcoming meetings at www.isoponline.org/training

ISoP 2024 Annual Meeting

“Global Perspectives on Pharmacovigilance in the Digital Age and Advanced Therapeutics”
1-5 October | Montreal, Canada

Scan for more information or visit www.isop2024montreal.org
Chapters

ISoP members in one country or geographical region are able to form groups to facilitate the organisation of meetings, training courses, or other activities related to the missions of ISoP.

Chapters have already been developed in Africa, China, Egypt, Indonesia, Italy, Latin America, Europe, Middle East, North America (NASoP), South Asia, UK and Ireland, and Western Pacific.

Special Interest Groups

A Special Interest Group (SIG) is a group of ISoP members acting on a voluntary basis on a specific and relevant topic which is within the scope and aims of ISoP. Currently there are established SIGs on:

- Women's medicines
- Risk communication
- Medication Errors
- Risk Minimisation Methods for Asian countries
- Vaccine surveillance
- Herbal and Traditional Medicines
- PV Professional Qualification Framework
- Pharmacogenomics
- Medical Device Safety
- Patient Engagement
- Ecopharmacovigilance
- Drug Safety in Older Patients
- Student Group
- Real-World Evidence and Big Data
- Pharmacovigilance in the Community

Meet Our Team

Our Executive Committee and Advisory Board are ready to accomplish our goals for these next three years. Meet our well recognized team of active professionals and experts in Pharmacovigilance.

We want to get to know you!

The Advisory Board is ready to hear about you and build with you the future of ISoP, as a big family we will continue together in this beautiful dream of patient safety. Please visit our social media channels or website and join us today.

Full information at www.isoponline.org/members
Our Partners

The official journal of ISoP is *Drug Safety*, published by Springer. ISoP is an affiliate of the European Association for Clinical Pharmacology and Therapeutics (EACPT). ISoP is an international member of CIOMS and has close ties with the WHO Programme for International Drug Monitoring and Uppsala Monitoring Centre (UMC) and has recently partnered with ECAMET.

We look forward to closer relationships with other scientific societies which share similar aims to ours, such as the International Society for Pharmacoepidemiology (ISPE).

Why become a Member?

- Reduced fees for all ISoP Meetings.
- Access to webinars throughout the year.
- Online access to the full content of *Drug Safety*, the journal of the International Society of Pharmacovigilance.
- Regional and international networking.
- Global collaboration on specific topics with the ISoP Special Interest Groups.

*If you wish to join, please complete the online membership form at [www.isoponline.org/members](http://www.isoponline.org/members)*
