# ISoP Workshop

**Verona, Italy**  
**26 & 27 March 2009**

**Ecopharmacovigilance**

First Announcement

# ISoP Workshop – Verona, 26 & 27 March 2009

## Ecopharmacovigilance

**This one and a half day workshop will be dedicated to train specialists in pharmacovigilance about a major field where pharmacovigilance is providing new and very relevant insights.**

**The programme will include the following topics:**

- Drugs in the environment
- Risk assessment of xenobiotics
- Risk assessment of pharmaceuticals in humans
- Green drugs
- The Swedish experience
- The regulatory perspective
- The drug company approach
- Present and future scenario in developing countries

This workshop is targeted at regulators, scientists and industry, to provide a better and more complete knowledge of drugs in relation to the environment, and identify and appropriately manage the risks associated with them.

There will be ample opportunities to exchange views and ideas in discussions both following individual presentations, after the panel discussion at the end of the seminar, and during coffee-break.

The faculty for this seminar consists of outstanding international experts in ecopharmacovigilance, representing academia, research institutions, associations, councils and industry.

This seminar is organized in the romantic and historic city of Verona, in Northern Italy.

In parallel, a basic training course in pharmacovigilance and a course in risk management will be offered.
