

# Tinnitus after covid-19 vaccination as an example of signals challenging for patients and public health authorities

**Join us via Zoom**

**Webinar for members only**

February 27, 2024

14:00 EST | 19:00 UTC | 20:00 CET

## **Hazel Clothier**

A/Prof Hazel Clothier is an infectious disease epidemiologist with specific interest in vaccine vigilance. Hazel is currently Epidemiology Lead for the Epi-Informatics Group at the Centre for Health Analytics, Murdoch Children's Research Institute.

## **Gregory A. Poland**

Dr. Poland is a leader in vaccinology and public health. As the director of Mayo Clinic's Vaccine Research Group, his pioneering work focuses on understanding genetic factors influencing vaccine response and advancing novel vaccine development.

## **Jim Buttery**

Jim Buttery is an infectious diseases physician and vaccinologist at the Royal Children's Hospital in Melbourne, holding multiple leadership roles in health analytics and child health informatics at the University of Melbourne.
